Cities are about people.
We want to become an internationally competitive city, with a higher standard of living for all.
Trade with 7 billion people around the globe or... 4.6 million New Zealanders?
We all benefit from addressing the issues we face as a growing city.
More economic and social vibrancy, more talented people, new businesses, and better jobs.
More choice around schools, sports and entertainment.
More people to share the costs of developing and running our city.
Investing in our future will benefit all of us.
What do you want for the future of our city?
